

Family Tree Half-Term Project

Next half term our driver topic will be science, with a focus on evolution and inheritance. Please create a family tree (go back as far as you can) and in addition, please add natural hair colour and eye colour for each person (where possible).

You can add drawings or photographs, and any added information you would like about your family members. You can choose how you would like to present your project, but it needs to be something that can come into school so we can share it in one of our science lessons.

If you are unable to do a family tree for your own family, you can research a celebrity you look up to and create a family tree for them.

Please see examples below for some inspiration:
